Wild & Wonderful Creatures Yr 1 and Yr 2 Animals including humans with a focus on wild animals/fish	Food Chains Yr 1 living things and their habitats with a focus on food chains.

NOTES

The order of the topics within each year could be subject to change when and where they would align with Humanities and other topic based work.

This long term rolling plan is subject to regular review and appropriate alterations in accordance with review outcomes and necessary provision planning for different cohorts.

This planning for our mixed age class ensures that children study plants, animals including humans, seasonal changes and materials each year. Some blocks combine aspects of both the Year 1 and Year 2 curriculum whereas others are based on the curriculum content of a particular year group. In these cases activities are included to incorporate teaching at the level of year 2 children or adapted to be more accessible to the year 1 children. In each year, more difficult work is covered towards the end of the year to ensure progression for the children.
